Statement:

EPA was notified by the National Response Center on Saturday, November 15, 2014 that the DuPont Laporte facility reported a release of Methyl Mercaptan from its facility. Emergency responders are on-scene including the Channel Industries Mutual Aid, the US Coast Guard, Texas Commission on Environmental Quality, county officials and EPA. Air monitoring is being conducted and initial results have not shown elevated levels of the chemical beyond the facility.

Let me know if there's changes. I can be reached at 214-864-7241

[Diane, do you have additional info you can share about our response to the chemical leak?](#)

[See below inquiry from the new York times.](#)

Thank you!

Alisha and Laura: Greetings. This is Manny Fernandez at the New York Times, the reporter who covers Texas for the paper.

Does either one of you have any info or details about the chemical leak today in La Porte, Tex., that killed 4 DuPont workers? Does the EPA have people at the scene and is there any indication what started the leak?

Thanks,
Manny
